[www.mptinc.com](http://www.mptinc.com)

We are conveniently located in Dresden, Ontario between the Toronto and Windsor/Detroit marketplace. Founded in 1990, M.P.T. Inc. has experienced steady growth and in 2000 purchased a 16,000 square foot facility and obtained ISO-9001 certification to better serve our customers' requirements for complete automation systems.

M.P.T. will continue to solve our customer's automation needs with a reputation for fairness, honesty and quality.

Under one roof, we can provide the electrical and mechanical design and build of your automation project. Our facilities house a large assembly shop, a machine shop and an electrical shop allowing us total control of the job.

The Program Manager is in complete touch with all aspects of the job at all times and will work with you to ensure that the job is completed on time to your specifications.

**THREE YEAR WARRANTY ON AUTOMATION**

All new projects carry a **THREE YEAR WARRANTY** on design and workmanship. Complete details are covered in your detailed and comprehensive quotation.

**SERVICE REWARDS PROGRAM**

In addition to our excellent warranty program shown above, we offer Service Reward Hours related to the value of the project.

These technical service hours can be used for:

Telephone support, additional training, preventative maintenance inspection, reports and minor adjustments etc.

## Six Steps To A Successful Project

**The Quotation:** Based on your well thought out scope of work, a site visit and perhaps a sample of the production part, we provide a detailed and comprehensive proposal leaving little doubt as to expectations.

**Project Launch Meeting:** Program Manager from M.P.T. meets with your people to start the project off on the right foot.

**Design Review:** Extremely essential to achieving the desired goals on time and on budget. At this time, we would like to meet with your team members including production, quality, safety and maintenance staff to review the design and make any necessary changes. A change at this point can have little or no effect on price or delivery.

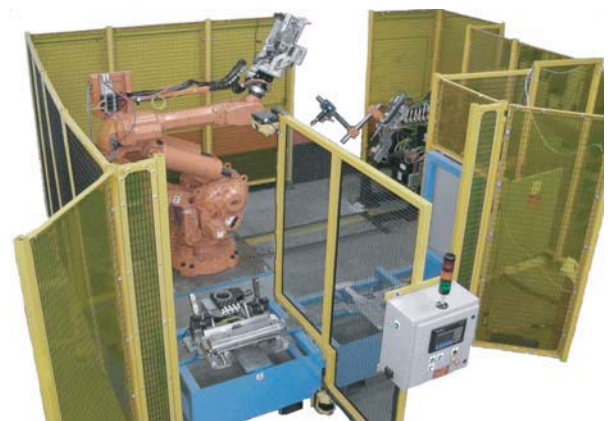

**From Concept**

**Machine Run Off At Our Facility:** You and your staff are encouraged to witness the runoff at M.P.T. Last minute adjustments are made if necessary and machine is ready for shipment.

**Debug And Training:** After the equipment is delivered, we provide qualified personnel to start up and train your staff on the new equipment.

**Documentation Package:** Attention to details from quotation to completion gets M.P.T. the first job, our documentation package is a strong reason for repeat business. You will be given a complete set of both printed and electronic documentation including operating instructions, trouble shooting guide, screen instructions, preventative maintenance schedule, spare parts list, complete mechanical, fluid power and electrical CAD and any special documentation and all the as-built design drawings.

**To Reality**

From 401 take Exit 101 - Kent Bridge Road  
Travel NW - approximately 25 Km  
Turn left and travel west on Baseline Road  
approximately 5Km towards Dresden  
Follow the curve to Community Road  
MPT Inc. is on the right
